Baptiste Lemonnier

FULL STACK DEVELOPER

Full stack developer at BEWAI since 2022, with a Master's in Computer Science (Software Architect track). I deliver products end to end, from the Node.js API to the React / Next.js front end and Docker hosting. Coding with AI is now part of my daily work: not an easy step to take, but it has become essential to stay at the top of the game.

EXPERIENCE

BEWAI bewai.com

2022 — present · 4 years

French AI startup in document processing. Its Bewai IDP platform automatically recognises, extracts and checks customer documents (subscription, KYC, compliance) for banking, insurance and brokerage.

- Full Stack Developer · Permanent — Jul 2024 — present
- Full Stack JS Developer · Work-study — Sep 2022 — Jul 2024
- Full Stack JS Developer · Internship — Apr — Aug 2022

I did my internship, my work-study and now a permanent role there: full stack development of the platform, from the React front end to the Node.js and PostgreSQL back end, and deployment for several clients based on their specific needs.

JS / PHP Developer · Internship

Apr — Jun 2021

Martel Le Vot · Coutances

Website for a racing stable: AJAX chat with investors and an admin interface.
